Ciao Michael, grazie per la segnalazione. Riesci a mandare il traceback? La pagina "gialla" che mostra l'errore ha un link "Copy&paste version", puoi mandarci il contenuto di quanto ti fornisce quel link, completo?

Cose fatte nel repository di octofussd:

- 1f565150 - Fix imports, avoiding from subprocess import *
- bc2f94d7 - Avoid exception when clicking on a quota-enabled filesystem [Questo ha poi reso palese il problema di differenza di costruzione dati tra octofussd mock e non: uno dà una lista, l'altro un dict]
- 4c49f4aa - Make the real octofussd construct a list and not a dict, to be coherent with template and mock octofussd
- Ora octofussd funziona sia in versione mock che reale

Pushato in master, nel repository di octofussd.

Uploadate sul repository nuove versioni di octonet (0.2.3-1) e octofussd (8.0.17-1): si può aggiornare e verificare se il problema è stato correttamente risolto.
