Ciao Michael,

puoi cortesemente fornirmi la versione dei pacchetti fuss-client e octofuss-client presenti sui client collegati?

#3 - 04/19/2017 11:39 AM - Michael Guggenberg

- File fc_test1.log added

```
root@test1:~# dpkg -l fuss-client

maiuscolo=grave) ||/ Nome                    Versione          Architettura        Descrizione
+++-=======================================-=========================-=========================-====================
==========================================================
ii  fuss-client            8.0.2          all             Connect a workstation to a FUSS Server
```

```
root@test1:~# dpkg -l octofuss-client
dpkg-query: nessun pacchetto corrispondente a octofuss-client
```

Allego l'output di fuss-client -a -g test1

#4 - 04/19/2017 11:42 AM - Christopher R. Gabriel

Ok, manca octofuss-client, che e' quello che si occupa di interagire con octofussd ed eseguire le operazioni (tra cui gli upgrade).

Come e' stato installato il client? Da ISO, da zero.. ?

#5 - 04/19/2017 11:46 AM - Michael Guggenberg

da fuss-client-jessie-amd64-201703221535.iso

#6 - 04/19/2017 11:58 AM - Christopher R. Gabriel

Ok, intanto apro ticket specifico, puoi installare octofuss-client e verificare che completi i task?

#7 - 04/19/2017 12:29 PM - Michael Guggenberg

installato octofuss-client su test1
riavviato il servizio su server e su test1

il job schedulato per ora non è stato eseguito

upgrade   dist-upgrade   2017-04-18 14:46:46   --   5

Uploadata nuova versione di octofuss-client (8.0.7-1) che mi pare risolva i problemi segnalati, testabile.

#15 - 06/08/2017 09:37 AM - Christopher R. Gabriel

- Assignee changed from Michael Guggenberg to Christopher R. Gabriel

Verificato oggi in aula la non esecuzione del task. Da verificare su installazione di test. Oltre che per gli upgrade, risulta anche per le stampante (postazione di Gianni), sospetto problema o di risoluzione inversa del client sul dns oppure scheduler di octofuss-client.

#16 - 06/08/2017 10:02 AM - Christopher R. Gabriel

- Assignee changed from Christopher R. Gabriel to Elena Grandi

Vedi #291, non avendo il server configurato non sincronizza i dati.

#17 - 06/08/2017 10:04 AM - Christopher R. Gabriel

- Related to Segnalazione #291: Configurazione server added

#18 - 06/08/2017 02:44 PM - Elena Grandi

- Assignee changed from Elena Grandi to Michael Guggenberg

Uploadata ora la versione 8.0.10 di fuss-client che configura l'indirizzo del server dove octofuss-client se lo aspetta.

Dopo aver aggiornato i vari client e rilanciato fuss-client riprovando dovrebbe andare.

#19 - 06/23/2017 11:39 AM - Michael Guggenberg

- Assignee changed from Michael Guggenberg to TRUELITE

fuss-client 8.0.12

cat /etc/octofuss-client/server
[Server]
address =

#20 - 06/23/2017 11:51 AM - Christopher R. Gabriel

- Assignee changed from TRUELITE to Michael Guggenberg

Octofuss-client legge /etc/fuss-client prima di /etc/octofuss-client (vedi #291)

Su questo ticket l'oggetto e' lo smaltimento della coda, quello e' verificato?

#21 - 06/26/2017 08:49 AM - Michael Guggenberg

test1   dist-upgrade   2017-06-23 09:05:16   --   1
test2   dist-upgrade   2017-06-23 09:06:23   --   1

root@test1-i386:~# cat /etc/fuss-client/server.conf
[Server]
address = 192.168.0.1

root@test1-i386:~# cat /etc/octofuss-client/server.conf
[Server]
address =

#22 - 06/26/2017 08:51 AM - Christopher R. Gabriel

Quindi e' corretto, come dicevo octofuss-client legge prima /etc/fuss-client/server.conf dove la configurazione e' esistente.

#23 - 06/28/2017 08:06 AM - Michael Guggenberg

Chiudo come risolto.
