

octonet - Segnalazione #66

Handle octofusssd connection refused error

11/23/2016 02:19 AM - Christopher R. Gabriel

Status:	Chiuso	Start date:	11/23/2016
Priority:	Normale	Due date:	
Assignee:	Enrico Zini	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
If the octofusssd backend is not running or not reachable (for remote usage), the connection refused is now an unhandled exception.			
We need to handle it and show the user a proper error message/page.

#3 - 11/28/2016 01:38 PM - Enrico Zini

- Status changed from Risolto to Chiuso

When connection refused is detected at the beginning of a view, now there's a redirect to the login view. Trying to login again gives a connection refused error message, unless the server is back.

This is better than a traceback, but not optimal. There's now a place to hook a more optimal solution, though.
